Subject Index to Volume 12

Accommodation	Supplementary research on changes caused by accommodation in the refractive elements of the eye (*Kabe*)	146
	Studies on accommodative convergence (*Yamamoto*)	155
Antibiotics	Effect of some antibiotics on the growth of trachom agent as observed by electron microscopy (*Matsubara et al.*)	60
ATPase	Electron microscopic-histochemical studies of ATPase in the human retina (*Oishi*)	51
Ciliary body	Electron microscopic study of rabbit ciliary body irradiated with fast neutrons (*Murai*)	1
Cornea	Effect of Na, K and Cl ions on trans-corneal potential and short-circuit current of the isolated rabbit cornea (*Muneoka*)	11
	Postoperative treatment of pterygium with Mitomycin C (*Mori et al.*)	30
	Electron microscopic study of the corneal nerve with special reference to its endings (*Matsuda*)	163
Electromyography	EMG study of the smooth pursuit movement of the eye in patients with multiple sclerosis (*Inaba et al.*)	103
	Electromyographic study of diabetic ocular neuropathy (*Maruo*)	200
Electron microscopy	Electron microscopic study of rabbit ciliary body irradiated with fast neutrons (*Murai*)	1
	Electron-microscopic-histochemical studies of ATPase in the human retina (*Oishi*)	51
	Effect of some antibiotics on the growth of trachoma-agent as observed by electron microscopy (*Matsubara et al.*)	60
	The fine structure of the human extraocular muscles (*Mukuno*)	111
	Electron microscopic study of the corneal nerve with special reference to its endings (*Matsuda*)	163
	Electron microscopic aspects on early changes of inherited dystrophic mouse retina	181
Electroretinodynamography	The clinical application of the flicker electroretinodynamography (*Usami et al.*)	85
Epidemic keratoconjunctivitis	The application of fluorescent antibody technique to studies of epidemic keratoconjunctivitis (*Ishizu et al.*)	173

Fluorescence fundus photography Clinical studies on occlusion of the retinal artery by fluorescein fundus photography (*Sano et al.*) 190

Fluorescent antibody technique The application of fluorescent antibody technique to studies of epidemic keratoconjunctivitis (*Ishizu et al.*) 173

Hearing Hearing impairment in retinitis pigmentosa (*Akabane*) 139

Injury Clinical and pathohistological investigations of optic nerve lesions in cases of head injuries (*Imachi et al.*) 70

Intraocular pressure Intraocular pressure in newborn infants (*Gotoh et al.*) 203

Muscles, extraocular The fine structure of the human extraocular muscles (*Mukuno*) 111

Histochemistry of catecholamine in the rabbit and human extraocular muscles (*Tsukahara*) 123

Ocular motility Dynamic model of strabismus devised with ophthalmotrope (*Kaneko*) 37

EMG study of the smooth pursuit movement of the eye in patients with multiple sclerosis (*Inaba et al.*) 103

Studies on accommodative convergence (*Yamamoto*) 155

Optic nerve Clinical and pathohistological investigations of optic nerve lesions in cases of head injuries (*Imachi et al.*) 70

Orbit Studies on orbitonometry (*Kuwabata*) 23

Persistent carotid-basilar anastomosis, a case of (*Kojima et al.*) 46

Refraction Studies on accommodative convergence (*Yamamoto*) 155

Changes caused by accommodation in refractive elements (*Kabe*) 146

Retina Electron microscopic-histochemical studies of ATPase in the human retina (*Oishi*) 51

Chromosomal aberrations in retiboblastoma (*Kobayashi et al.*) 96

Occlusion of retinal artery by fluorescein fundus photography (*Sano et al.*) 190

Retinitis pigmentosa, hearing impairment in (*Akabane*) 139

Vitamins Experimental vitamin B_{12} neuropathy (*Ishikawa*) 131
